PERCEPTION

1. In general, you see in the students who have participated in the project an increase in their motivation in their daily work.

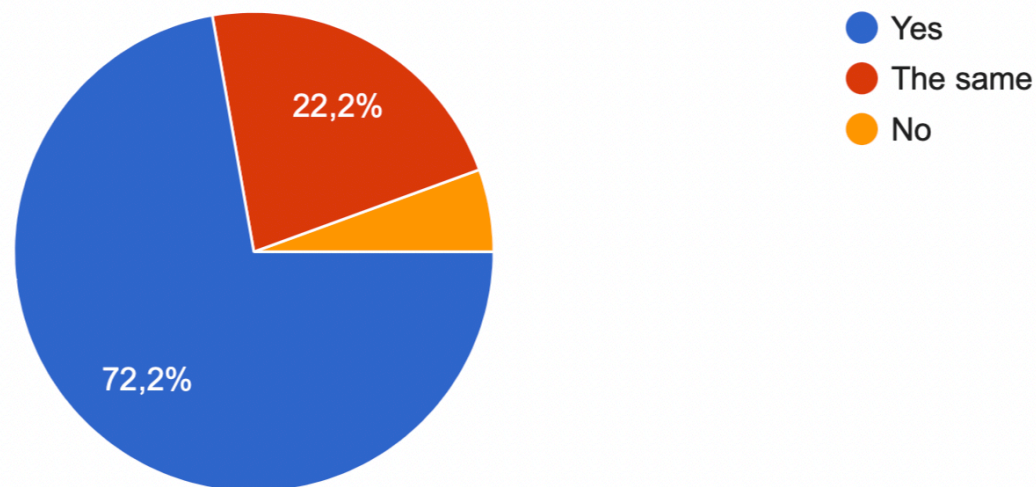

18 respuestas

- 100% of them
- 75%
- 50%
- 25%
- It is more or less the same as before
- The students participating in this project generically advance less than others not participating

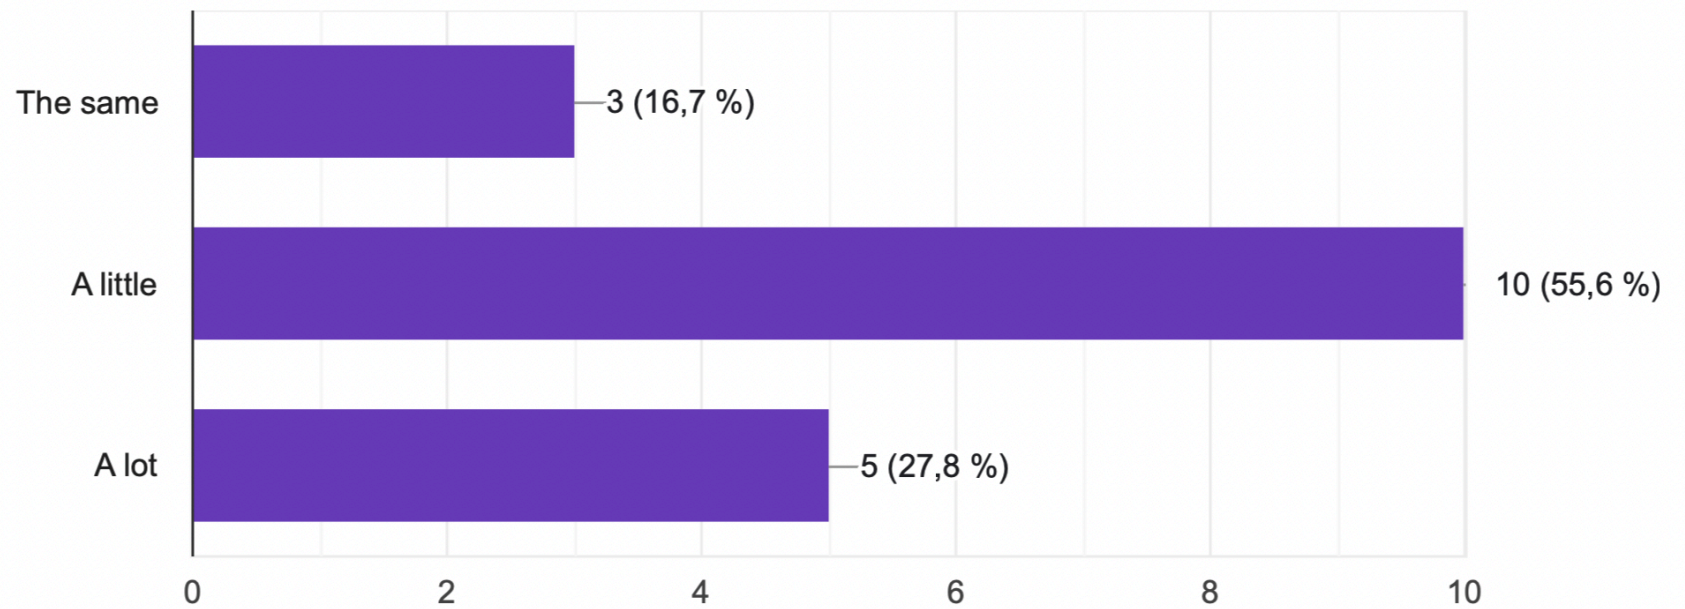

2. Do you think that the participation in this project by students has increased the chances, compared to students who have not participated in this project, that some of them will decide to continue their higher education studying classical guitar?

18 respuestas

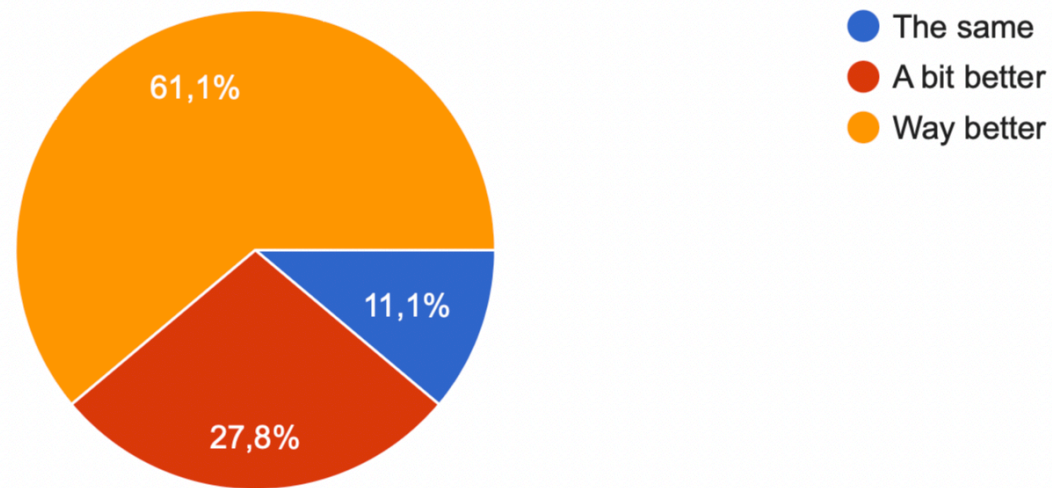

3. Do you think that your level of English has increased after participation in the project?

18 respuestas

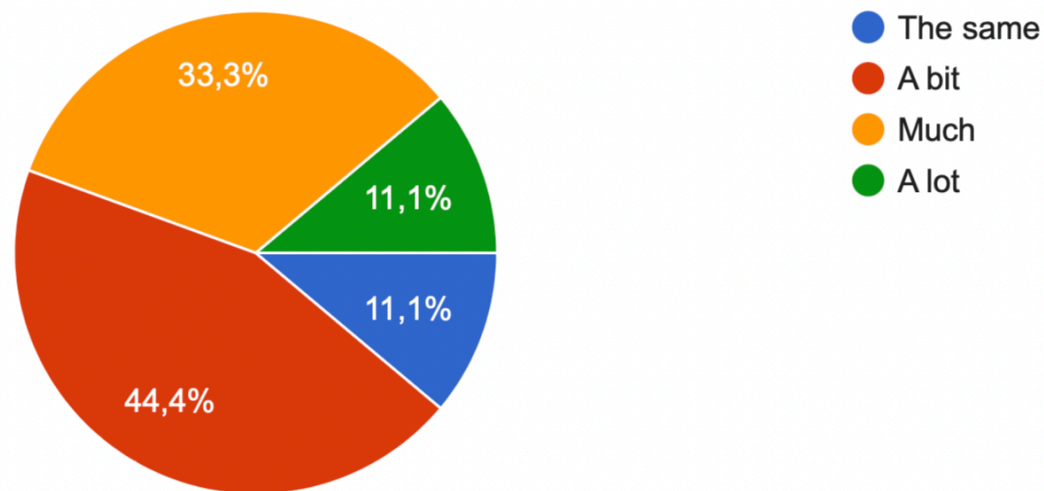

3. Do you consider that you have a better knowledge of the history of your instrument after the project?

18 respuestas

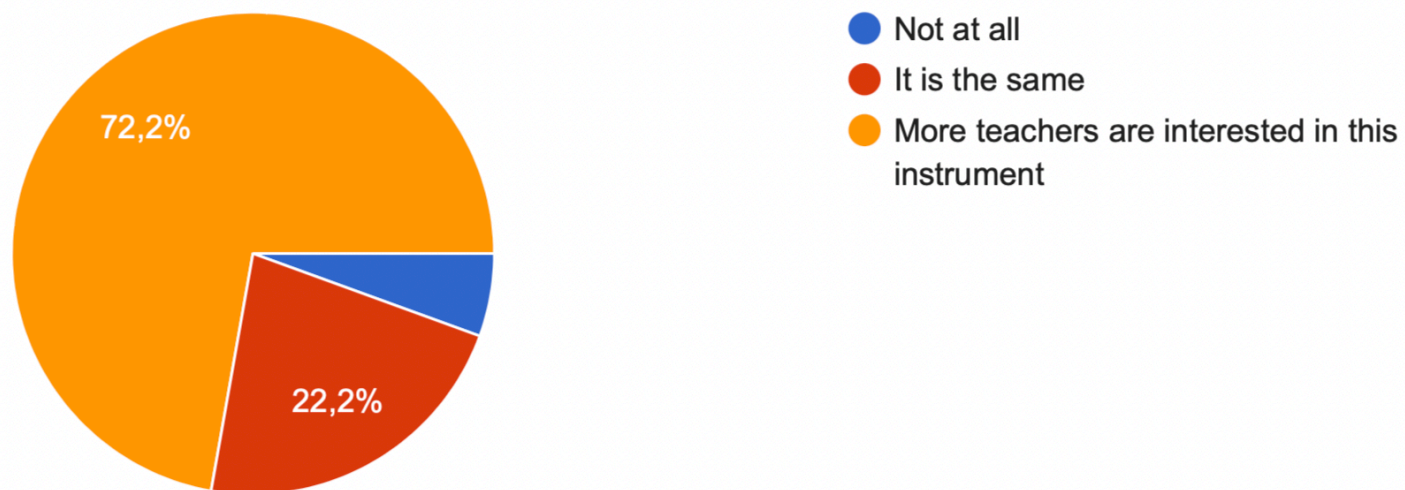

4. Do you think that there is a transfer between the participation in the project and the quality of your lessons in your daily life?

18 respuestas

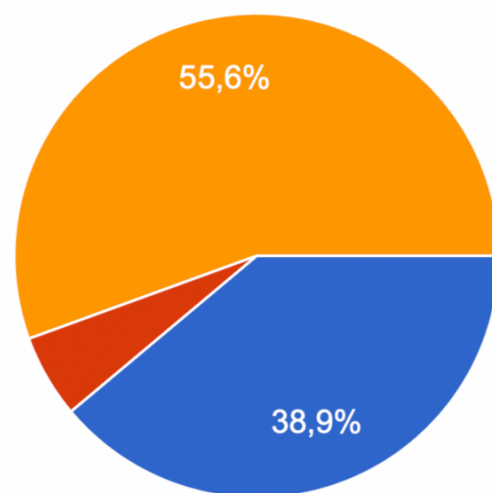

5. Do you think that this project has helped to give more visibility to the guitar within your academy?

18 respuestas

6. Has participation in this project involved more effort than you had originally thought?

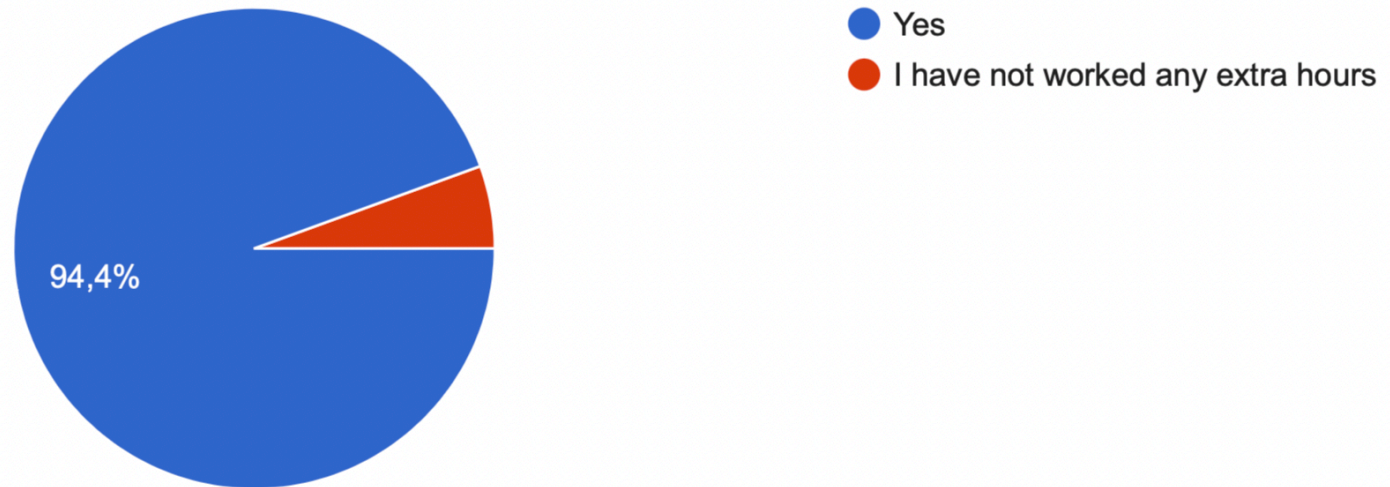

18 respuestas

-  It is exactly as I thought
-  I was expecting to work less
-  I have worked way more than expected

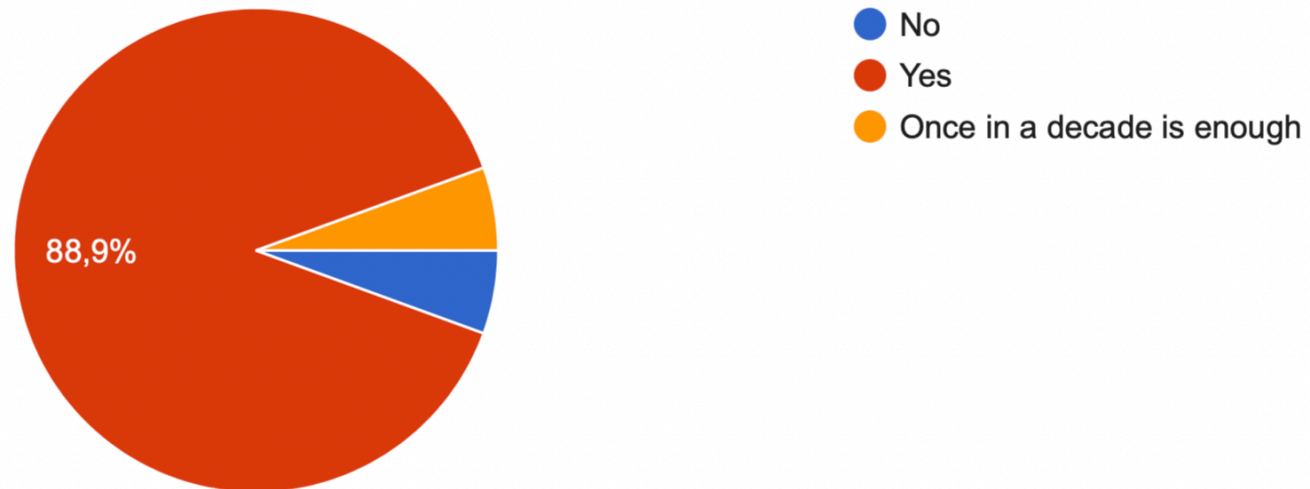

7. Related to the former question, Do you think that participating in this project has considerably increased the number of extra hours you dedicate to your work?

18 respuestas

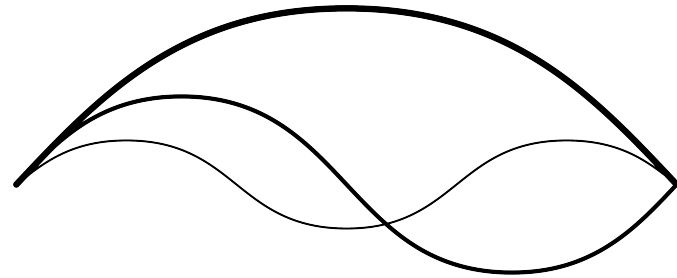

8. Would you participate in a project of this type again?
